

What to Expect with TMS

TMS Patient Journey

Transcranial Magnetic Stimulation (TMS) is an FDA-approved, non-invasive therapy for the treatment of Major Depressive Disorder (MDD) & Obsessive Compulsive Disorder in patients that have failed medication trials or have not reached full remission from symptoms.

Complimentary Consultation	Meet with a Patient Consultant to learn about the TMS therapy treatment process and complete TMS registration for insurance
Pre-Assessment	Office visit with the TMS Certified Psychiatrist, Physician, or Nurse Practitioner (NP) to evaluate whether TMS is right for you
Motor Threshold	A psychiatrist, physician, or NP identifies the precise area(s) of the brain to be treated, and establishes the treatment settings and protocol
TMS Treatment	<ul style="list-style-type: none">• Daily 19-minute treatment session or multiple treatment sessions in a day lasting just a few minutes each• During treatment patients can relax, listen to music, etc.• Most patients can begin to feel some improvement in just 2-3 weeks with significant relief by the end of treatment
Post-TMS Treatment	Based on results, your TMS provider will make recommendations for further care to you and/or your primary doctor

We keep you informed throughout your treatment journey.

- Significant efficacy and safety validated through multiple clinical studies
- Dedicated Care team with an individualized treatment plan
- TMS therapy is covered by most major insurance companies, including Medicare, Tricare, and many state Medicaid plans
- We ensure a prior authorization is obtained when necessary before the start of treatment

*Insurance guidelines for TMS therapy vary by payer network. See your insurance policy medical guidelines for transcranial magnetic stimulation for specific coverage criteria.
